

*From Willie & Hugh Pillon  
Strawberry Square "Snowbirds"*

*We would like [the square dancers] know we won't be coming to Florida this winter. Hugh had a fairly rough summer. It started with kidney failure in May, but it was actually an enlarged prostate. He had retained 12 litres of fluid in his kidneys and was about to go into kidney failure. He lost 25 lbs overnight after they caught it.*

*He waited 2 months for surgery which wasn't successful and then another 6 weeks for TURP surgery. When they did the last surgery they found he was having some heart problems. So now he is waiting for bypass surgery. It may be 2 months before he even gets a consultation and then the time he has to wait for the bypass. Plus there will be recovery time and rehab.*

*To make matters worse, 5 hospitals in southwestern Ontario have been cyber attacked by terrorists. They are demanding ransom money and the hospitals are refusing to pay so they have started downloading patient information on the dark web. So much information has been lost or the equipment doesn't work.*

*Hugh is feeling okay but he has to remain calm. He walks very slowly. He had no permanent damage to his kidneys.  
Please say hello to the group from us when you have your get together in December.*

*Please keep us in your prayers, Thank you  
Willie & Hugh*
